

APEX : One cutting tool for every application

Cutting tools Center of Excellence

Thanks to decades of experience in the field of aerospace assembly, and more generally in the industry, we offer a cutting tool for every application. Our center of excellence's expertise allows us to supply high-performance cutters.

Our range of products

- Standard tools (catalog)
- Customized tools (tailor-made to fit the customer's needs)
- High quality microstop cages

Our services

- **A wide range of products** covering the whole field of applications
- Dedicated teams for a **customized support**
- The possibility to validate our solutions and to develop new tools through our **R&D department**
- **An efficient distribution network** thanks to a large number of sites and partnerships based worldwide

Fields of application

Coatings

To enhance our cutters performances, we can propose a range of coatings for demanding applications.

To guarantee an optimal result, each coating is chosen to **perfectly fit the material to drill and the cutting parameters.**

Our experience as an advanced drilling unit supplier, helps us to define the best **cutting parameters / cutter geometry / coating combination.**

Our drilling expertise

Single layer	Aluminium	Titanium	Carbon	Inconel	Stainless steel	Steel	Glare	Fiber glass
--------------	-----------	----------	--------	---------	-----------------	-------	-------	-------------

Multi layer	Carbon	Carbon	Carbon	Titanium	Aluminium
	Aluminium	Carbon	Titanium	Carbon	Titanium
				Aluminium	Carbon

Regrinding

Our cutting tool Center of Excellence can also offer a **regrinding service.**

Several part numbers are eligible, including certain coated cutters.

By ensuring a **quick turnaround**, we can support the customers who want to guarantee their **continuity of production.**
